

# Visul on track for Infrarail 2010

**Specialist surface mounted  
tactile paving manufacturer**

**Visul Systems is officially launching there Section 12  
approved platform edge warning surface at Infrarail  
2010 – its innovative new flame resistant tactile  
system developed for underground stations.**

The system utilises the latest developments in resin flooring  
technology to meet the unique needs of the railway  
industry.

**Application of Section 12 Platform Blister**

Visul's section 12 edge tiles and adhesive is a Methacrylate  
(MMA) based system which is fully flexible, hard wearing  
and can be applied to all sound station platforms and stair  
cases.

Visul Systems will be introducing there products at Infrarail  
2010 in conjunction with leading rail industry body Rail  
Alliance.

Ross Carty, Visul Systems Marketing Manager, said: "Our  
Section 12 warning surface has been specifically formulated  
to meet the growing demands of the rail industry, providing  
fit for purpose floors that meet the needs of users and offer  
a sustainable solution at ground level.

It is fire resistant to London Underground Ltd Section 12  
specification and speeds up construction and  
refurbishment process due to its rapid application  
process – with the floor generally ready for use within  
two hours.

**Stepney Green Tube Station**

In conjunction with launching there Section 12 warning  
surface Visul is also exhibiting there traditional range of  
polyurethane warning surfaces which has been widely  
adopted as the clients preferred choice when specifying  
tactile paving. Benefits include:

- Rapid curing
- Speed of installation – no surface excavation  
Required
- Harder wearing than concrete equivalent
- One stop application – own fully trained installation  
crew available
