

FUNGICIDAL WASH

Description

A non-toxic, non-irritant anti-fungicidal wash miscible with water, with detergent properties designed to combat the main biological problems on exterior surface of algae, lichen and moss.

Applications

- As a general fungicide before repainting.
- Treatment of plaster to combat fungal growth whilst drying out.
- Treatment of plaster, concrete or brick work to prevent the spread of dry rot fungus.
- General cleaning and sterilising solution for use in dairies, breweries etc.

Advantages

- Effective against a wide range of micro-organisms.
- Non-toxic and non-irritant.
- No effect on drying, adhesion or durability of subsequent applied coatings.
- Simple to use.

Technical Information

Water Miscible Liquid	
S.G.:	0.98
pH:	7.8
Flash Point:	Not Flammable

Application Instructions

Fungicidal Wash should be diluted at a ratio of 4 parts water to 1 part Fungicidal Wash. Surfaces heavily contaminated with fungal growth should be sprayed or brushed with Fungicidal Wash. The moss and lichen etc., will be killed and can be removed from the surface within 72 - 96 hours either by brushing or pressure washing. Surfaces such as plaster or concrete which are to be treated as a precautionary measure should be washed or sprayed and allowed to dry prior to any further treatment.

Packaging

Fungicidal Wash is available in 5 and 25 litre containers.

Storage

Store in sealed containers at moderate temperature and keep out of the reach of children.

Health & Safety

No toxicity or skin irritation has been noted but as individual skin sensitivity varies we would recommend the use of gloves and goggles and prolonged skin contact should be avoided.

Technical Support

Through our technical department and laboratories we can offer a comprehensive service to specifiers and contractors.

Technical representatives are available throughout the UK to provide further information and arrange demonstrations.
