

The UK's most effective range
of formwork and concreting
products are
WRAS Approved

- **Chemlease**

CONCRETE CHEMICAL RELEASE AGENT, which gives optimum release and will produce a high quality finish from all types of formwork

- **Biolease** 

BIODEGRADABLE, NON FLAMMABLE MOULD RELEASE AGENT designed for use on all types of formwork to give an excellent release and first class finish.

- **Chemcure S**

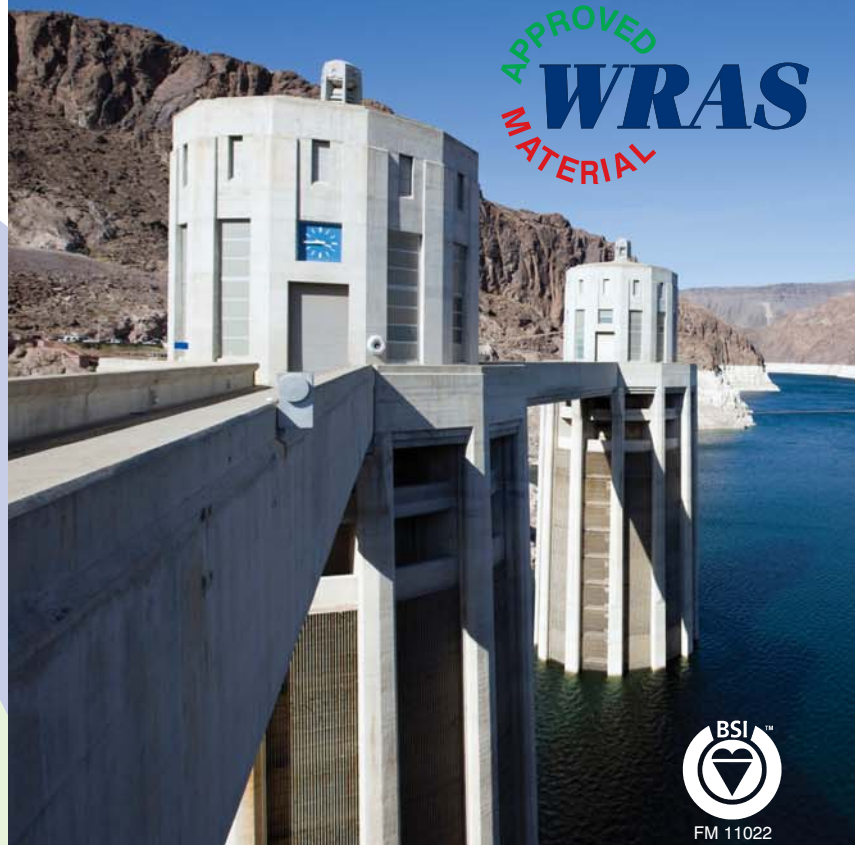

CONCRETE CURING LIQUID, Aqueous solution of metallic silicates which when applied to fresh concrete forms a micro crystalline seal in pores reducing evaporation.

- **Formstrike WB** 

CONCRETE RELEASE AGENT, based on a neat oil with surfactant, suitable for a wide range of formwork materials.

- **Nufix SBR**

RUBBER LATEX EMULSION, designed to upgrade the bonding, waterproofing and abrasive qualities of sand cement renders and screeds.
