

# Nufins - Specialist Construction Projects

## Victoria Square, Belfast

The brand new Victoria Square leisure facility in the heart of Belfast city centre has recently opened consisting of 500,000sq ft of retail space, 150,000sq ft of leisure facilities, including a health club cinema and restaurants and around 100 residential units.

Through leading distributor [SIG](#), Northern Ireland Nufins supplied a significant amount of construction chemicals and cementitious grouts.

## Runway Repairs

Nufins were requested by AMEC - Carillion Joint Venture at Manchester International Airport to provide a material for runway repairs that had qualities of robustness, flexibility and ease of application. The repair mortar was required to tolerate uneven loading by aircraft wheels with axle loadings of up to 150 tons and single wheel loading of 26 tons.

**Epiflex** was supplied for large section repairs in the order of 350mm – 450mm that were undertaken between May to September 2006. Site Manager Paul Saysell of Amec commented "Epiflex was poured easily into the repair area and had adhered extremely well".

**Epiflex** is a hybridized 3 part epoxy resin repair mortar that is durable with high adhesion characteristics. It may be used for gap-filling and patch repairs where there is a requirement for hard wearing long service life and inbuilt flexibility.

## Award Winning Street

Newcastle City Council have been using Nufins **High Spec Paving** since 2000 and during the past 7 years Nufins have successfully supplied more than 600m<sup>3</sup> of paving mortars for laying Caithness stone pavers and Granite setts in the Graingertown area of the city. Newcastle City Council are delighted with the material and its performance.

**Hi Spec Paving** is designed for use on vehicular-trafficked & pedestrian areas and was recently supplied to a prestigious project in Scarborough.

**In 2002 Grey Street in Newcastle was voted the Favourite Street In Britain.** (Source: BBC News Friday, 20 September, 2002)
